WELCOME! THIS SCRIPT IS AN AUTOMATIC PENETRATION TESTER. IT WILL ALLOW YOU TO SCAN A LAN NETWORK YOU ARE CONNECTED TO, FIND LIVE HOSTS, SCAN EACH HOST FOR OPEN PORTS, RUNNING SERVICES AND POTENTIAL VULNERABILIT IES. IT THEN WILL PERFORM BRUTE FORCE ATTACK (IF POSSIBLE) AND PRINT REPORTS FOR THE TARGETTED NETWORK AND ITS IPS. ENJOY!

YOU LOGGED IN WITH AN ADMINISTRATOR ACCOUNT. GOOD: WE CAN CONTINUE!

CHECKING IF /tmp/VULNER AND /tmp/VULNER/192.168.0.0 EXISTS AND CREATING THEM IF NOT. WE CAN CONTINUE.

REMEMBER THAT ALL THE RAW INFO GATHERED BY ALL SCANS FOR NETWORK 192.168.0.0/24 WILL BE STORED UNDER THIS DIRECTORY: /tmp/VULNER/192.168.0.0

BE AWARE THAT ALL DATA STORED UNDER /tmp WILL BE DELETED AFTER YOUR NEXT REBOOT! (DON'T WORRY: YOU WILL S OON CHOOSE WHERE TO SAVE FINAL RESULTS REPORTS.)
